

# STN Event 2022 – Programme

## Day one (27 September)

<b>Timings</b>	<b>Plenary sessions</b> Plenary Chair: <i>Dr Martin McKechnie, STN National Clinical Lead</i>		
9:30am	Registration and refreshments		
10:00am	Welcome		
10:05am	Opening: <i>Graham Ellis – Deputy Chief Medical Officer</i>		
10:20am	Phase 1 complete – now phase 2 Dr Martin McKechnie, STN National Clinical Lead		
10:40am	Trauma Desk to Critical Care Desk Martin Esposito, Consultant Paramedic, Major Trauma, SAS		
11:00am	Development of the SAS trauma 'jellyfish' Dr Tim Parke, Associate Director SAS APCC		
11:30am	Refreshments		
<b>Workshops</b>	<b>Fintry</b>	<b>Harris</b>	<b>Ochil</b>
12:00pm - 12:45pm <a href="#">Click here to view workshop allocation</a>	<b>STAG – Scottish Trauma Audit Group</b> <i>The session will be about making the best use of patient questionnaires and improving the collection rate to improve data quality. The main aim being to demonstrate we are “giving lives back” not just saving lives.</i>	<b>COBIS – Care of Burns in Scotland</b> <i>This will be a session on burns dressings, including a presentation on first aid and initial burn management.</i>	<b>Trauma Co-ordinator</b> <i>This workshop is specifically targeted for Trauma Co-ordinators attending the conference. It will be an interactive agile retro activity, giving an opportunity for Trauma Co-ordinators to collaborate and share best practice and patient experiences. During the session we will discuss areas/processes within their role which work well, their role satisfaction, present challenges faced in performing the role and identifying future challenges and what can be done in advance to overcome before they arise.</i>

12:45pm – 1:45pm	Lunch, poster viewing, exhibition and networking		
1:45pm – 2:30pm	<b>Research + Innovation Working Group Session</b>  <i>During this session, Professor Alan Carson will explain the objectives of the STN Research &amp; Innovation group and what the group hopes to achieve in future. The session will include a presentation by Claire Lawrie, updating on the GG&amp;C Prescribing Pilot data pilot.</i>	<b>COBIS – Care of Burns in Scotland</b>  <i>This will be a session on burns dressings, including a presentation on first aid and initial burn management.</i>	<b>Education Working Group Session</b>  <i>Using the NMAHP Development Framework for Major Trauma: Activities and ideas for your own and other’s Continuing Professional Development.</i>  <i>This workshop will introduce the recently published <a href="#">NMAHP Development Framework for Major Trauma</a> and involve activities demonstrating how to apply it to you as an individual or within a team setting. We will explore career stories in relation to moving through the levels of the framework as well as using the four pillars of practice and considering different types of learning opportunities.</i>
2:30pm	<b>Plenary sessions</b> <b>Plenary Chair: Dr Martin McKechnie, STN National Clinical Lead</b>		
2:35pm	<b>COBIS – Care of Burns in Scotland – Implementation of a National Burns Hub</b>		
2:55pm	<b>Regional Updates</b> <b>Dr Brian Digby, WoS Clinical Lead, Mr Edward Dunstan, SEoS Clinical Lead, Dr Michael Donald, EoS Clinical Lead, Mr James Anderson, NoS Clinical Lead</b>		
4:25pm	<b>Q&amp;A</b> <b>Q&amp;A session following afternoon sessions featuring Clinical Leads</b>		
4:50pm- 5:00pm	<b>Close: Dr Martin McKechnie, STN National Clinical Lead</b>		

## Day two (28 September)

<b>Timings</b>	<b>Plenary sessions</b> Plenary Chair: Dr Martin McKechnie, STN National Clinical Lead			
<b>9:00am</b>	<b>Registration and refreshments</b>			
<b>9:30 am</b>	<b>Welcome</b>			
<b>9:35 am</b>	<b>Opening - Caroline Lamb, Chief Executive of NHS Scotland and Director General for Health and Social Care</b>			
<b>9:50am</b>	<b>Paediatrics</b>			
<b>10:20am</b>	<b>STAG</b>			
<b>10:45</b>	<b>SABIN – Head Injury Data from STAG – Andreas Demetriades, Clinical Lead for Scottish Acquired Brain Injury Network</b>			
<b>11:00am</b>	<b>Refreshments</b>			
<b><u>Workshops</u></b>	<b>Fintry</b>	<b>Harris</b>	<b>Ochil</b>	<b>Carrick</b>
<b>11:30am-12:10pm</b> <a href="#">Click here to view workshop allocation</a>	<b>Trauma App</b> <i>This session will talk through the implementation of the Trauma App at the QEUH and RHC.</i>	<b>Pre-Hospital – Major Trauma Triage</b> <i>The adult and paediatric Major Trauma Triage Tools (MTTTs) are now being utilised by Scottish Ambulance Service clinicians in pre-hospital trauma care. The MTTTs were launched in-line with the Scottish Trauma Network (STN) on 30th August 2021 to triage trauma patients to the most appropriate definitive care. The MTTTs are a key part of trauma care and benefit patients who are significantly injured or involved in high mechanism incidents. This workshop will look at the adult and paediatric MTTTs, the changes to practice and influence on effective triage. There will also be interactive scenarios within the session to demonstrate the use of the MTTTs and major trauma triage in practice.</i>	<b>NES Psychology</b> <i>This session will introduce the high prevalence of traumatic events and the psychological impact that these can have on people. It will encourage participants to consider how the emotional impact of trauma may present in their major injury settings for patients and the staff teams involved in their care, and the potential of a trauma-informed approach in connecting with people at any stage of their recovery journey.</i>	<b>Optimising Rehabilitation</b> <i>Topic 1: Assessing PTA in Major Trauma: Accurate outcome prediction after traumatic brain injury (TBI) is important in order to enable appropriate rehabilitation planning and provision of accurate prognostic information for patients and their families (Walker et al., 2010). Currently, estimation of post-traumatic amnesia (PTA) is viewed as one of the best indicators of injury severity and predictor of functional and cognitive outcome following head injury (McMillan et al., 1996; Nakase-Richardson et al., 2009).</i>

				<p><i>A Revised-WPTA Scale (Ponsford et al., 2004) was developed for assessing patients with head injury. The Major Trauma TBI service in the Royal Infirmary of Edinburgh has implemented regular PTA scoring as part of the early assessment and intervention of this patient group. During this workshop we shall give some feedback on our findings and experience using this screening tool.</i></p> <p><i>Topic 2: Brief insight into the theory of Cognitive Behavioural Therapy (CBT) and associated case study of using this approach in a patient's rehabilitation.</i></p>
<p><b>12:15pm-1:00pm</b></p>	<p><b>Major Incidents – “How much medical care at scene?”</b></p> <p><i>Major incidents present a significant challenge in balancing three aspects of prehospital care at the scene: Triage, Treatment and Transport. The aim is to ensure that patients leave scene having been appropriately prioritised, with immediate threats to life and severe pain addressed, and sent to the right hospital to meet their needs using the best available means. This workshop will explore some of the challenges inherent in balancing these goals in the midst of a complex evolving incident.</i></p>	<p><b>STAG – Scottish Trauma Audit Group</b></p> <p><i>The session will be about making the best use of patient questionnaires and improving the collection rate to improve data quality. The main aim being to demonstrate we are “giving lives back” not just saving lives.</i></p>	<p><b>NES Psychology</b></p> <p><i>This session will introduce the high prevalence of traumatic events and the psychological impact that these can have on people. It will encourage participants to consider how the emotional impact of trauma may present in their major injury settings for patients and the staff teams involved in their care, and the potential of a trauma-informed approach in connecting with people at any stage of their recovery journey.</i></p>	<p><b>Paeds Working Group Session</b></p> <p><i>Since the staggered launch of the Scottish paediatric trauma networks there has been so much great work undertaken to support children and families, from injury prevention strategies and acute care to facilitating their rehabilitation journey. Some of this work is recognized as aligning with adult STAG criteria but we're keen to also identify the significant efforts which are more child-specific and may not always be picked up by these traditional tools. During the paediatric group workshop, we will be discussing standardization of criteria for recording a dataset across the</i></p>

				<i>networks to allow us to highlight this added value for the children of Scotland. Input from all geographical and specialty areas would be highly valued, particularly from stakeholders who contribute infrequently to paediatric care in addition to their more standard role (including pre-hospital and trauma unit staff)</i>
<b>1:00pm-2:00pm</b>	<b>Lunch, poster viewing, exhibition and networking</b>			
<b>2:00pm</b>	<b>Plenary sessions Plenary Chair: Dr Martin McKechnie, STN National Clinical Lead</b>			
<b>2:05pm</b>	<b>Inspirational stories Patient story from patient who went through trauma pathway</b>			
<b>2:45pm</b>	<b>Rehab - Reflections on delivering Rehabilitation within the Scottish Trauma Network</b>			
<b>3:30pm</b>	<b>Firecrest</b>			
<b>4:00pm-4:30pm</b>	<b>Close: Humza Yousaf – <i>Cabinet Secretary for Health and Social Care</i></b>
